

优乐选添加商家模块

模块搭建

新建Module

新建maven模块youlexuan-shop-web，pom.xml和youlexuan-manager-web相同，指定端口9003

web项目配置

创建目录youlexuanshopweb\src\main\webapp\WEB-INF，拷贝web.xml，并删除安全过滤器
拷贝
youlexuanshopweb\src\main\resources\applicationContext.xml
youlexuanshopweb\src\main\resources\log4j.properties
youlexuanshopweb\src\main\resources\springmvc.xml

拷贝静态文件

拷贝“中公教育\第四阶段授课资料--视频2019-6-5\优乐选课件--2019-6-13\资源\静态原型\商家管理后台”下所有文件到webapp

代码拷贝

```
youlexuan-sellergoods-  
interface\src\main\java\com\xxx\proj\service\TbSellerService.java  
youlexuan-sellergoods-  
service\src\main\java\com\xxx\proj\service\impl\SellerServiceImpl.java  
youlexuanshopweb\src\main\java\com\xxx\proj\controller\SellerController.java  
youlexuanshopweb\src\main\webapp\js\base.js  
youlexuan-shop-web\src\main\webapp\js\base_pagination.js  
youlexuanshopweb\src\main\webapp\js\controller\baseController.js  
youlexuanshopweb\src\main\webapp\js\service\sellerService.js  
youlexuanshopweb\src\main\webapp\js\controller\sellerController.js
```

注册

修改注册页

修改youlexuanshopweb\src\main\webapp\register.html

引入依赖

```
<script type="text/javascript" src="plugins/angularjs/angular.min.js"></script>  
<script type="text/javascript" src="js/base.js"></script>  
<script type="text/javascript" src="js/service/sellerService.js"></script>  
<script type="text/javascript" src="js/controller/baseController.js"></script>  
<script type="text/javascript" src="js/controller/sellerController.js"></script>
```

设置作用域

```
<body ng-app="youlexuan" ng-controller="sellerController">
```

修改表单

```
<div class="control-group">
  <label class="control-label">登陆名（不可修改）： </label>
  <div class="controls">
    <input type="text" ng-model="entity.sellerId" placeholder="登陆名"
class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">登陆密码： </label>
  <div class="controls">
    <input type="password" ng-model="entity.password" placeholder="登陆密码"
class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">店铺名称： </label>
  <div class="controls">
    <input type="text" ng-model="entity.name" placeholder="店铺名称"
class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">公司名称： </label>
  <div class="controls">
    <input type="text" ng-model="entity.nickName" placeholder="公司名称"
class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">公司电话： </label>
  <div class="controls">
    <input type="text" ng-model="entity.telephone" placeholder="公司电话"
class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">公司详细地址： </label>
  <div class="controls">
    <input type="text" ng-model="entity.addressDetail" placeholder="公司详细
地址" class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">联系人姓名： </label>
```

```
<div class="controls">
  <input type="text" ng-model="entity.linkmanName" placeholder="联系人姓名"
class="input-xfat input-xlarge">
</div>

<div class="control-group">
  <label class="control-label">联系人QQ: </label>
  <div class="controls">
    <input type="text" ng-model="entity.linkmanQq" placeholder="联系人QQ"
class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">联系人手机: </label>
  <div class="controls">
    <input type="text" ng-model="entity.linkmanMobile" placeholder="联系人手
机" class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">联系人EMAIL: </label>
  <div class="controls">
    <input type="text" ng-model="entity.linkmanEmail" placeholder="联系人
EMAIL" class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">营业执照号: </label>
  <div class="controls">
    <input type="text" ng-model="entity.licenseNumber" placeholder="营业执
照号" class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">税务登记证号: </label>
  <div class="controls">
    <input type="text" ng-model="entity.taxNumber" placeholder="税务登记
证号" class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">组织机构代码证: </label>
  <div class="controls">
    <input type="text" ng-model="entity.orgNumber" placeholder="组织机
构代码证" class="input-xfat input-xlarge">
  </div>
</div>

<div class="control-group">
  <label class="control-label">法定代表人: </label>
  <div class="controls">
```

```

        <input type="text" ng-model="entity.legalPerson" placeholder="法定代表人"
class="input-xfat input-xlarge">
    </div>
</div>

<div class="control-group">
    <label class="control-label">法定代表人身份证号: </label>
    <div class="controls">
        <input type="text" ng-model="entity.legalPersonCardId" placeholder="法定
代表人身份证号" class="input-xfat input-xlarge">
    </div>
</div>

<div class="control-group">
    <label class="control-label">开户行名称: </label>
    <div class="controls">
        <input type="text" ng-model="entity.bankName" placeholder="开户行支行"
class="input-xfat input-xlarge">
    </div>
</div>

<div class="control-group">
    <label class="control-label">银行账号: </label>
    <div class="controls">
        <input type="text" ng-model="entity.bankUser" placeholder="银行账号"
class="input-xfat input-xlarge">
    </div>
</div>

```

修改提交按钮

```

<div class="controls btn-reg">
    <a class="sui-btn btn-block btn-xlarge btn-danger" ng-click="reg()"
target="_blank">申请入驻</a>
</div>

```

修改JS

添加提交方法

修改youlexuanshopweb\src\main\webapp\js\controller\sellerController.js

```

$scope.reg = function () {
    $scope.entity.status=0;
    sellerService.add($scope.entity).success(function (response) {
        alert(response.message);
        if (response.success)
            location.href = "shoplogin.html";
    })
}

```
